Tr Training Room

INTERACTIVE CLASSROOM SIMULATOR

Features Highlights

- PowerPoint based for ease of use
- Unlimited Keypads
- Self Creation of Training Content
- Repeatable Training
- Electronic Polling and Testing
- Immediate Student Feedback
- Non- Hardware Dependent
- Inexpensive
- Courseware available by experts in the field
- Load existing PowerPoint lessons making them interactive
- Free Software

The Training Room is a keypad system that allows an instructor to have everyone in the class connected to the system in real time. While presenting material in either video or verbal format the instructor can poll the class, test on a topic, or can create a discussion on student responses. This powerful training tool helps tremendously in the retention levels of a class and will keep the entire class focused and alert.

The students can answer true or false, multiple choice, or rank answers in order. When presenting; an instructor knows if his class is following along or should more time be spent on one topic. If there is no need to remediate, the class moves forward with total understanding, saving time and money.

INTERACTIVE CLASSROOM SIMULATOR

TR – 101 Training Room

- Ti** TrainingRoom®
Interactive Classroom Training System
24 - (RF) Keypads
1 - USB Receiver
1 - Nylon carrying case
1 - Electronic (PDF) manual
Includes:
1 – Courseware title, “The Law & You”
1 – Courseware title, “Tennessee v. Garner”

Minimum System Requirements:

- Windows 2000 or newer version
- PowerPoint 2000 or newer version
- USB Port on computer

Additional Key pads can be ordered up to 999 per system

RF Receiver:

The Training Room receiver is a small USB connection device. It can be used in multiple environments since it fits any computer. The Tr Software is free and can be loaded on an unlimited number of agency computers. Training content can be authored offline. When presenting, the addition of the receiver and keypads provide a dynamic, interactive experience.

Potential into Success:

Training Room audience response technology engages participants and encourages success. Training sessions integrated with Training Room involves participants in the presentation - encouraging consistently high levels of interaction throughout the entire session. The net result of implementing audience response technology is an increase in participation, comprehension and retention.

Training Room-Complete Integration into Microsoft Office Suite

Use Microsoft PowerPoint®, the presentation standard to create student interaction points specific to your classroom curriculum.

Track response information and view reporting results with Microsoft Excel® and Microsoft Word®.

Create and import question lists with Microsoft Word®.

Communicate and share collected information with Microsoft Outlook.
